## Summary

Java Developer with **4 years** of experience building and maintaining enterprise financial applications using Java, Spring Boot, Angular, Hibernate, and SQL databases. Experienced in REST API development, SQL optimization, production support, and client-facing solution delivery. Strong problem-solving skills with hands-on experience in scalable business applications.

## Professional Experience

**Software Engineer | SoftCafe IT Solution Ltd.**

**| July 2022 – Present**

- Engineered and delivered full-stack enterprise financial applications (E-Signature, MFS, DPS Portal, Remittance, UMS, Account Statement, eAdvice) using Java, Spring Boot, Angular, and REST APIs, ensuring scalability, security, and seamless business operations.
- Contributed to system architecture and modular design while improving application performance by ~15% through SQL optimization, stored procedure tuning, and Jasper Reports enhancement.
- Led production debugging and live issue resolution across critical systems by performing log analysis, root cause analysis, and rapid fixes to maintain high system stability.
- Managed deployments, release validation, rollback support, and post-production monitoring, ensuring smooth and reliable production releases.
- Collaborated with clients and stakeholders in requirement gathering, technical discussions, and demos, translating business needs into compliant and timely technical solutions.
